

# 51 Million People.

According to the U.S. Census Bureau, that is how many people are living in the U.S right now with a disability.

## How many of your non-disabled members are eligible for SSI benefits?

**More than you think!** If your plan is feeling the financial pinch and is starved for new sources of revenue and savings, we understand your dilemma. That is why we would like to introduce you to **MasterMine<sup>PLUS</sup>**, helping Medicaid Managed Care Plans get more out of their data so your plan gets maximized revenue and your members get the SSI benefits they deserve.

### MasterMine<sup>PLUS</sup> is truly in a class all by itself:

- HIPPA compliant learning-based technology that moves forward with your data and gets better over time.
- Layered, deeper data dives that target disabled members and those members with disabled dependents.
- Rapid fire to marathon analysis that gives your plan the flexibility to identify and capture more disabled members.
- Increased data mining analysis over the competition, including Pharmacy, which most predictive models do not do well.
- More effective targeting on profitable cases.
- Breakouts by provider to better locate target members and outreach to them quickly and efficiently.
